Declaration of Performance

Lattix® 4438

No. 0402 – CPR – SC0444-12

Lattix®

Product name

Lattix® 4438

Product specifications

The Lattix® 4438 mast system can be used as mast for sign support, other information and surveillance equipment or other applications. The mast is delivered as a complete assembly including mast, base plate and top plate.

The mast is tested and approved according to:

- EN 12899-1, Fixed, vertical road traffic signs
- EN 12767, Passive Safety of support of structures for road equipment

Full-scale impact crash tests and simulations have been performed according to EN 12767 at a speed of 35 km/h and 100 km/h with 6,3 m mast length. Simulations show that the mast will have equal performance up to 8,623 m length. Consequently, the mast is approved for 8,623 m maximum height and minimum distance of 1,5 m from the ground to bottom of sign.

Referring to EN 12767 the untested reduced minimum height of the lower edge of the sign shall not be lower than 2,0 m due to the risk of the penetration of the windscreen of an impacting car, but lower installations may be used when evaluated.

The Lattix® 4438 mast system is approved both as single and multi-legged support. For multi-legged supports the distance between the inside of each of the legs must not be less than 1,6 m. All performance presumes sufficient foundation.

Performance under vehicle impact (passive safety) according to EN 12767:2000	Value
Performed speed class tests and simulations	35 km/h and 100 km/h
Approved speed class	100
Approved function class	NE (non energy absorbing)
Approved safety class	2

Durability	Value
Resistance to corrosion	Aluminium, class SP 2

The Lattix® 4438 mast system is produced in many standard lengths, but can also be produced in customized length if desired.

Lattix® 4438	
Standard length [mm]	Art. Nr.
883	JU200757
1606	JU200756
2379	JU200755
3212	JU200780
3985	JU200781
4758	JU200782
5531	JU200750
6304	JU200751
7077	JU200752
7850	JU200753
8623	JU200754

Maximum length is 8623 mm. Length tolerances according to EN 755-9

Material / Surface treatment

Mast: EN-AW 6063 T66
Base plate: S355J2+N, Hot dip galvanized steel according to EN ISO 1461
Bolts: BUMAX 109

The Lattix® 4438 mast system can be powder-coated, anodized and chromed.
All classes of corrosion resistance can be provided by various surface treatment.

Data / Weight

Product	Mast side length [mm]	Section shape [mm], (square-cut)	Mast weight [kg/m]	Base plate weight [kg]	Bolt pattern, foundation [mm]	Foundation thread/nuts
Lattix 4438	375	375 x 375	21,8	Ca. 58	435 x 435	M30

Capacity

Product	Maximum bending moment, M_u [kNm] *)	Stiffness for bending, EI [kNm ²]	Shear capacity, F_u [kN]	Maximum torsion moment, T_u [kNm] *)	Stiffness for torsion, Gk [kNm ²]	Stiffness for torsion, Gk [kNm/(deg/m)]
Lattix 4438	152	5069	65,2	21	630	11

*) The moments do not take into account the partial material factor γ_m . EN 12899-1 gives a γ_m for aluminium of 1,15.

Assembly and accessories

The Lattix® 4438 mast is delivered fully-assembled with top plate and accordant base plate if not specified differently.

Lattix® Element Masts can be delivered with accessories kits:

- top plates,
- base plates,
- foundations,
- sign clamps,
- cable covers,
- brackets for tunnel,
- connector plates
- etc.

For assembly information, please ask for the assembly guide.

Maintenance

No maintenance required.

Lattix®

CE marking and system of assessment and verification of constancy of performance

CE marked according to EN 12899-1:2007 in compliance with
Regulation 305/2011/EU.

Notified body no. 0402.

See attached certificate.

The CE label gives all important information on data and capacity. Within the
production process the masts are marked for traceability.
